Learn about the course offerings, and find the course description. STAT1010_UCF.pdf online econometrics course for class 10th.pdf. Q: UIScrollView with Custom UIScrollViewBackground in Swift I'm trying to set my scrollView to a custom uiBackground to make it look like my app is running on iPhone 6. I found this : UIScrollView with custom UIScrollViewBackground in Swift The code looks fine, but when I run my app, it's crashing without throwing any exception. The background of the scrollView is black without any content. A: There are a few things to take into account when creating your scroll view with a custom background: If you use setBackgroundImage, your UIScrollView will need to be aware of the size of its contents and the size of your custom background. So you need to set scrollView.contentSize to be bigger than the size of your custom
