
Modernwarfare2zonefilesdownload

April 26, 2016 - All files in the main mw2 folder, as well as all files in the mw2 zone, such as iw01.iwd or binkw32.dll. It still uses #begin and #finish .bat files. Just in case, I will keep the main mw2 folder in the folder if you want to help me or you can contact me later. #begin is my own #finish .bat file which executes the #begin file which will be executed if it can't find the #begin file. If you see #begin, #finish .bat in the mw2 folder, it simply means that the #begin file was not found and the #finish.bat file is now being executed. The #begin file must be in the same folder as the mw2 folder for #begin to run.
